SUMMARY

*Software Engineer / Java Developer with hands-on **FinTech** experience, specializing in legacy system modernization, transactional API optimization, and database-driven application support. Proven track record in designing high-availability **Java** solutions, performing comprehensive Root Cause Analysis (**RCA**), and implementing system enhancements across complex financial enterprise platforms. Adept at migrating legacy workflows, streamlining backend processes, and ensuring seamless **API integration** to maintain high system uptime and security standards.*

PROFESSIONAL EXPERIENCE

JAVA DEVELOPER - VERTERE GLOBAL SOLUTIONS, INC. — May 2026 - Present

- Refactored a **Java-based digital onboarding platform** into a product-aware architecture, enabling scalable support for **savings accounts, credit cards, personal loans**, and loan onboarding workflows.
- Implemented extensible handler and routing components (Strategy & Adapter patterns) that **reduced hardcoded** business logic and simplified future product integration.
- Applied **SOLID principles** and clean architecture design patterns to enhance code maintainability, testability, and system scalability.
- Integrated legacy decisioning engines through **adapter-based abstractions** while preserving backward compatibility.
- Developed and executed **1,300+ automated unit tests**, ensuring high test coverage and reliable, production-ready releases via automated **CI/CD build pipelines**.
- Collaborated with cross-functional teams—including architects, business analysts, test analysts, and business partners—to **deliver high-priority enhancements** using Java, Spring Boot, Spring WebFlux, Maven, JUnit, and Git.

PROGRAMMER ANALYST - VERTERE GLOBAL SOLUTIONS, INC. — February 2024 - December 2025

- Built **SMS and EMAIL Notification** using **Spring boot**, **Java**, and **IBM ACE** to notify the client of their made transactions.
- Handle and maintain accuracy of **transactional API's** (Fund Transfer, Cash Withdrawal/Deposit, etc.) using **REST/SOAP** API.
- **Develop**, **test**, **analyze** and **maintain** software applications using Java**,** IBM ACE**, Oracle SQL** based on the designed plan.
- Involvement in **RCA** for different environment (**SIT, UAT** and **PROD**) and **present the solution** of those problem statement.
- Deploy the project to **DEV, SIT, UAT** and **PROD** after **100% passed** in **Regression** and **Automation Testing**.
- **Maintain** user manuals and **train end users** to operate new/modified programs, install software products and scripts.
- Liaise with vendors for efficient implementation of new software products and collaborate with **QA,BA**, and **DBA** team.

JAVA DEVELOPER - TSUKIDEN GLOBAL SOLUTIONS INC. — May 2023 - January 2024

- Design, develop, testing (unit testing creation and execution), implement, and maintaining of specific software solutions in java while maintaining a focus on quality principles.
- Involvement in **code reviews**, create reusable codes, and **bug fixing** based on the tickets in the **Redmine**.
- Translated Japanese business requirements, module designs, and **hospital** workflows into English technical documentation to engineer and deploy a **National Health Insurance** application adopted by leading government hospitals across **Japan**.
- Developed end-to-end application features leveraging **Struts2, JSP, CSS**, and **PostgreSQL**.
- Implement Regression Testing using **Postman** after deployment in DEV/SIT/UAT environment.

JAVA DEVELOPER - NORIMA TECHNOLOGIES INC. — June 2022 - March 2023

- Create reusable Java codes during training and implementing **Hibernate**, and **JPA**.
- Maintain error free based on the tickets in **JIRA** aligned in the existing web application project of the client.
- Create a capstone that related to an **insurance** project called **Policy Administration System** aligned with the project in MAJESCO using **core Java**, **MySQL**, **HTML**, **CSS**, **JavaScript**, and **Apache Tomcat**.
- Got the Six Sigma White Belt in Aveta Business Institute Certificate.

Office Staff (DESIGNER) - H.R.D (SINGAPORE) PTE. LTD. — November 2019 - May 2022

- Develop **technical solutions** related to the business requirements and maintain database using MySQL.
- Execute material and **structural calculation design** for every floor plan of the house of the Japanese clients.
- Gather all final design in different departments to create a final blueprint.

EDUCATION

Bachelor of Science in Computer Science - Cavite State University - CCAT Campus

- June 2015 - June 2019

Thesis

- Facial Recognition Attendance Management System

TECHNICAL SKILLS

Category	Skills & Technologies
Backend & Core	Java, Microservices
Frameworks	Spring Boot, Spring MVC, Spring WebFlux, Struts2
Frontend	HTML, CSS, JavaScript, jQuery, JSP
Databases & ORM	JPA, JDBC, Hibernate, MySQL, Oracle SQL, PostgreSQL, EDB, H2
API Technology	REST API, SOAP API
Testing & Quality	JUnit, Mockito, Postman, SonarQube
Development Tools	Eclipse, IntelliJ IDEA, Visual Studio Code, Apache Tomcat, Maven
Tools & DevOps	IBM ACE, WinSCP, BMC Software, TortoiseSVN, Git, GitLab, GitHub, Jira, Redmine, SpiraService
